

QUALITY POLICY

We will with superior customer service and quality awareness marketing and stock a wide range of sealings, gaskets, valves and instrumentations.

This we will do by prioritizing high product quality, delivery precision and beneficial total price. We should have an open and honest communication with our partners to understand and meet their needs and requirements. Our goal is to meet our partners' expectations. We do this by doing the right thing early in the processes, meet applicable requirements, taking individual responsibility for the quality of our work and strive for continuous improvement.

We want to be perceived as the good company where we put social responsibility and sustainability issues in constant focus.

Quality Policy adopted at management meeting 2017-03-02

TODAY FOR TOMORROW.
